

LINKABLE COVE LIGHT

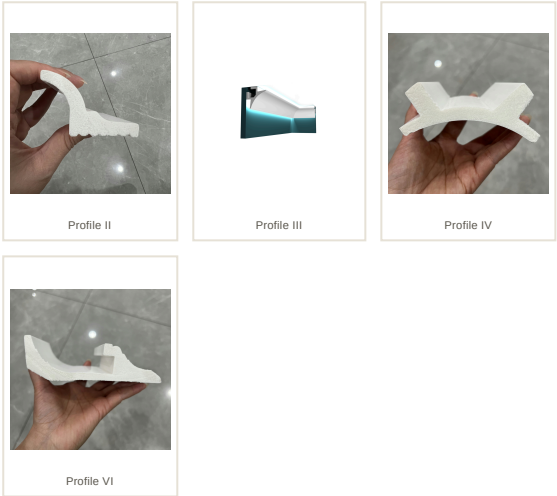

Covea Linkable Cove Lights

Warm, even light washes along the ceiling line from the Covea cove profiles, the slim channel vanishing into the crown so only the glow reads. Because the light runs continuously along the full profile, there are no visible bulbs or hot spots — just a smooth, unbroken line of illumination that wraps corners cleanly and washes the upper wall. Five profiles cover different crown depths; all link into continuous runs. Architectural light that lets the room, not the fixture, take center stage.
