

STRIP LIGHT

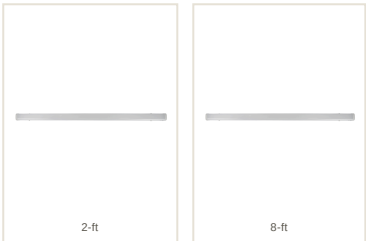

STR LED Strip Light

Consistent, edge-to-edge light runs the length of the STR LED Strip Light, built for stockrooms, garages, workshops, and other utility spaces. Field-selectable wattage and 5-CCT color let one fixture match warm or cool applications at install, and smooth 0–10V dimming on universal 120–277V ties it into a control system or occupancy sensor. The low-profile housing mounts direct to a ceiling or hangs on chain — 2, 4, and 8-foot runs for small nooks up to long ceiling runs.
