

LANDSCAPE · DECK / STEP

Still Deck / Step Lights

Warm light traces the edge of every stair tread and deck board after dark with the Still Deck / Step Light, marking each step and landing before you find it with your foot. Its compact, low-profile body sets into a riser or deck edge almost flush, and it's wet-rated to handle direct exposure to rain, snow, and standing water without failing. Wired on a simple 12V low-voltage run for easy placement during a build or retrofit, Still is durable landscape lighting that makes the yard beautiful past sunset.
