

SITE / LANDSCAPE · BOLLARD

Vector Architectural Bollards

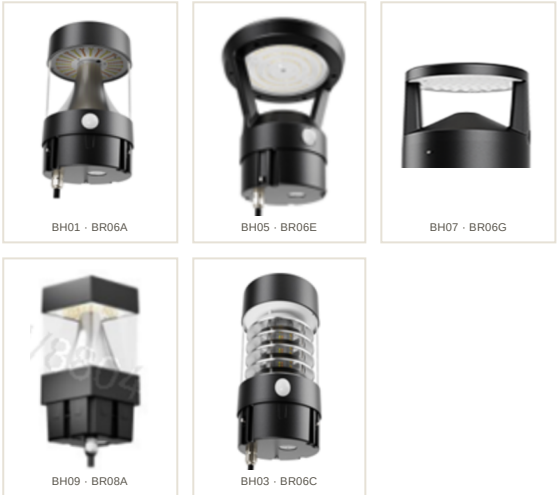

Bright, even light rings the base of the Vector Bollard, an architectural column built to hold up outdoors. Its rugged, outdoor-rated housing lines walkways, plazas, parking areas, and site perimeters with steady, glare-controlled output that keeps paths safe after dark. Field-selectable wattage and color temperature let one fixture cover a range of spec requirements, and the compact bollard form drops into a standard anchor base or mounting sleeve for a straightforward install across a whole property. Finished in Black to keep specs simple, Vector delivers code-ready performance that pays back fast.
