

OUTDOOR · MODULAR RGB

Hex RGB Panel Light Kits

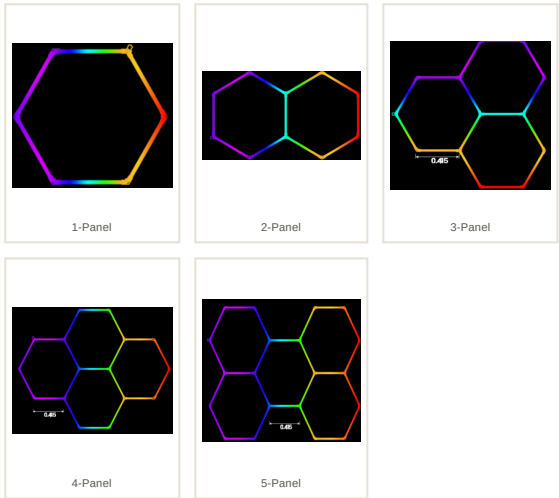

Build a glowing display one hex at a time. Modular RGBW panels shift through millions of colors or settle into a clean, tunable white glow across a wall, patio, or landscape bed, and each panel snaps edge-to-edge with the next so the honeycomb layout grows as the space evolves. Finished in White to blend into daylight surroundings and offered in kits from a single panel up to eleven — a modular light that makes any outdoor space glow, one panel at a time.
