

BATH FAN · FAN + LIGHT

Aeri Ultra-Quiet Bath Fan + Light

Clear steam fast and keep the mirror light going with the Aeri Ultra-Quiet Bath Fan. Its whisper-quiet motor pulls moist air out of a powder room or hall bath without the usual rattle — as low as 0.8 sones — while a built-in LED adds a warm glow overhead so you're never left in the dark mid-shower. The IC-rated, low-profile housing sits flush to the ceiling for a clean, finished look, and it wires into an existing bath remodel on a standard 4-in. duct. Two airflow ratings — 70 CFM for a compact bath, 110 CFM for a larger one — both ETL, HVI, and Energy Star certified.
