

BATH FAN · VENTILATION

# Airra Ultra-Quiet Bath Fan

Clear the steam and the odor fast with the Airra Ultra-Quiet Bath Fan. Its ultra-quiet motor pulls moist air out of a powder room or hall bath without the usual rattle and hum — as low as 0.8 sones — while the IC-rated, low-profile housing sits flush to the ceiling for a clean, unobtrusive look. Simple to wire into an existing bath remodel on a standard 4-in. duct, Airra runs quietly in the background so the room stays fresh, dry, and free of lingering odor. Two airflow ratings — 70 CFM and 110 CFM — both ETL, HVI, and Energy Star certified.
